

GREENHOUSE GAS VERIFICATION STATEMENT

REYNDERS LABEL PRINTING

VINÇOTTE nv

Jan Olieslagerslaan 35
1800 Vilvoorde, België

Organisation

Reynders label printing
Nijverheidsstraat 3
2530 Boechout
Belgium

Period

01/01/2024 – 31/12/2024

Verification procedure

The verification was performed by Vinçotte in accordance with ISO14064-3 meeting the requirements of the GHG protocol – Corporate Accounting and Reporting Standard.

Verified amount

Total emissions: 9 620 tCO₂e

Scope 2 market based emissions: 4 593 tCO₂e

This statement may only be communicated and reproduced in its entirety and without change. Page 1 of 3

User of the GHG-assertion

Internal and external stakeholders, the general public

Level of assurance

Limited assurance¹

Objectives, scope and criteria:

Vinçotte performed on behalf of Reynders label printing a limited assurance of the anthropogenic greenhouse gas emissions between 01/01/2024 – 31/12/2024. The system boundaries for the greenhouse gas emissions are aligned with the operational control approach.

The entities within the system boundaries are located in Belgium, France, Poland, Spain, India and Germany.

- Reynders Etiketten nv
- Reynders Pharmaceutical labels nv
- Reynders Cosmétique sa
- Reynders Etiquettes France sa
- Reynders etiketten Polska Sp. Z o.o.
- Reynders Label Printing India Pvt. Ltd.
- Reynders Labelling Automation SL
- Reynders Etiquetas España
- Reynders Etiketten Deutschland GmbH

The greenhouse gas inventory considered activities and processes carried out within the aforementioned regions.

The greenhouse gas inventory included direct emissions and part of indirect emissions.

- Category 1 direct emissions: stationary combustion, mobile combustion and fugitive emissions;
- Category 2 indirect emissions: purchased energy;
- Category 3 other indirect emissions: waste generated in operations and fuel and energy consumption.

The greenhouse gasses included were: CO₂, CH₄, N₂O, HFC's, PFC's, SF₆ and other refrigerant gasses not included in the Kyoto-Protocol. The data and information for the greenhouse gas inventory were mainly historical in nature.

The verification consisted of an independent review of the primary data, the emission factors and the greenhouse gas calculations. The goal was to verify if the data and the results of the greenhouse gas calculations were complete, reliable, transparent, accurate and free of material errors or omissions.

Conclusion

Vinçotte has verified the greenhouse gas assertion of Reynders label printing of 9 620 ton of CO₂-eq and scope 2 market based emissions 4 593 tCO₂e in 2024 to a level of limited assurance.

The greenhouse gas inventory was prepared according to the requirements of the GHG Protocol.

Based on the work undertaken, nothing came to the attention of Vinçotte to indicate that the reported greenhouse gas emissions of Reynders label printing for the period 01/01/2024 – 31/12/2024 are materially misstated.

This statement may only be communicated and reproduced in its entirety and without change. Page 2 of 3

¹ See Annex 1

Declaration of independence

The verification was carried out by Vinçotte as an independent third party.

On behalf of Vinçotte,
23/09/2025

Margot De Cock
Project Engineer Sustainability & Environment
